

CWD FORMULA COLLECTION

BOOK OF FORMULAE WITH SEARCH

URAI[®]

CWD - FORMULA COLLECTION

CWD – Formula Collection is the ideal software for paint shops and retailers, offering advanced control over formulas and color charts. It provides complete access to technical and safety documentation, including safety labeling. It has a fully customizable interface and is integrated with leading brands of automatic color mixing machines and label printers.

CWD – Formula Collection allows for flexible and advanced price management, with immediate discount and markup options. A small integrated management system also allows you to track product history, providing a comprehensive tool for monitoring store activity.

Formula viewing is clear and immediate, and the ability to edit the base-colorant ratio and manage various product sizes allows for complete autonomy in your work method.

The “Search” function allows you to use a spectrophotometer to find the most similar color in the database. This advanced feature optimizes formula selection directly at the point of sale.

The software can be digitally licensed via the CWD Server Formula Collection or run standalone with a Sentinel dongle.

FUNCTIONS AVAILBLE IN THE VERSION:

1. Identify the closest color using a spectrophotometer with the “Search” function
2. Quickly and massively upload and edit formulas and color charts
3. Create customized price lists with discounts and markups for individual customers and product history
4. Compatible with automatic color mixing machines and label printers
5. Configure layouts, logos, and enable/disable specific features
6. Provides access to technical and safety documentation
7. Ability to perform remote license upgrades
